

To install or add a network, wireless, or Bluetooth printer

If your printer is on and connected to the network, Windows should find it easily. Available printers can include all printers on a network, such as Bluetooth and wireless printers or printers that are plugged into another computer and shared on the network. You might need permission to install some printers.

1. Select the **Start** button, then select **Settings** > **Devices** > **Printers & scanners**.
[Open Printers & scanners settings](#)
2. Select **Add a printer or scanner**. Wait for it to find nearby printers, then choose the one you want to use, and select **Add device**.

If your printer isn't in the list, select **The printer that I want isn't listed**

 Add Printer

Find a printer by other options

☐ My printer is a little older. Help me find it.

☐ Find a printer in the directory, based on location or feature

☐ Select a shared printer by name

Browse...

Example: \\computername\printername or
http://computername/printers/printername/.printer

☐ Add a printer using a TCP/IP address or hostname

☐ Add a Bluetooth, wireless or network discoverable printer

☒ Add a local printer or network printer with manual settings

Next

Cancel

 Add Printer

Choose a printer port

A printer port is a type of connection that allows your computer to exchange information with a printer.

☒ Use an existing port:

LPT1: (Printer Port)

☐ Create a new port:

Type of port:

Evolis TCP/IP Monitor

Next

Cancel

 Add Printer

Type a printer name

Printer name:

Evolis Primacy ETH

This printer will be installed with the Evolis Primacy driver.

Next

Cancel

In the next screen you'll define if you want to share printer or not.

 Add Printer

Printer Sharing

If you want to share this printer, you must provide a share name. You can use the suggested name or type a new one. The share name will be visible to other network users.

☐ Do not share this printer

☒ Share this printer so that others on your network can find and use it

Share name:

Evolis Primacy ETH

Location:

Comment:

From now on you should have an instance of a printer called « Evolis Primacy ETH » in control panel > devices and printers

Right click on the instance > Printer properties ; then go to « Ports » tab

Select Standard TCP/IP and click on « New port »

Add Standard TCP/IP Printer Port Wizard

Welcome to the Add Standard TCP/IP Printer Port Wizard

This wizard helps you add a port for a network printer.

Before continuing be sure that:

1. The device is turned on.
2. The network is connected and configured.

To continue, click Next.

Add Standard TCP/IP Printer Port Wizard

Additional port information required

The device could not be identified.

The detected device is of unknown type. Be sure that:

1. The device is properly configured.
2. The address on the previous page is correct.

Either correct the address and perform another search on the network by returning to the previous wizard page or select the device type if you are sure the address is correct.
